This class will take the look of English paper piecing to a whole new level! You get the look of it without all the work. These stamps put a permanent ink that does not bleed, is acid free and safe for fabrics, onto the fabric. It is much faster to sew this on the sewing machine than by hand but if you prefer handsewing, it is much easier to stitch on the lines. In this class we will learn how to creatively place elongated hexagons to make a beautiful design. We will also learn the fussy stamping method in class. Information will be sent prior to class. You only need the Acrylic templates or the stamp set not both
